

Integrated Services for Gas Allocation Measurement - Features & Benefits

The *Production iMeasurement* service encompasses the full breadth of *Coastal Flow's* foundational measurement capabilities, with seamless integration that results in a wide range of operational features and benefits, including:

Features	Benefits
Comprehensive corporate natural gas Measurement Policy.	Provides a framework for producing accurate and accountable measurement data consistent with industry standards and best practices.
FLOWCAL Enterprise [®] System.	Data reviewing, editing, validation, and reporting through software that is the recognized world-wide gold standard for advanced hydrocarbon measurement.
Core functions of natural gas measurement are automated and integrated into a single process.	Analysts have more time to focus on sources of unacceptable measurement error while often dramatically reducing overhead costs.
Data management and processing by certified and highly experienced measurement analysts.	Trained analysts are accurately and confidently able to identify the 50 most common sources of measurement error for timely correction.
Increased measurement accuracy and accountability.	"Lost and Un-Accounted For" (LUAF) quantities are reduced while risks associated with royalty payments, sales-gas allocations, and regulatory/contractual compliance are minimized.
Senior-level SMEs (Subject Matter Experts) are available, as needed.	Experienced measurement consultants can provide broad technical support, including design, training, LUAF review, sales verification, trouble shooting, etc.
Secure Internet-based access to reports and statements through BirdDog [™] Web Report Warehouse.	Employees and entitled third-parties have 24x7 encrypted, password-protected web access to flow and measurement data for all areas of operations.
Measurement data archived in accordance with API Ch. 21.1 Audit Trail requirements for a 7-year period.	Provides electronic access to original and edited flow data in the event of an audit or other ad hoc need.
Web-based portal for purchasing measurement equipment and supplies.	Allows as-needed purchases of common measurement equipment and supplies.
Comprehensive Disaster Recovery and Business Continuity (DR/BC) protection.	Minimizes business disruption and lost data in the event of an emergency or unplanned outage.

To realize considerable cost savings while achieving superior measurement results, take the next step and schedule a meeting by contacting us via email (CFMinfo@CoastalFlow.com) or phone at **(281) 282-0622**.
